50X Helping Investors to Make Informed Decisions

Aerospace BD (www.aerospacebd.com) is delighted to announce we have recently completed our 50th buy-side due diligence project in the Aerospace and Defense (A&D) electronics industry. In just two years we have built a team of respected industry technologists with a relentless passion for assisting investors in navigating the rapidly evolving electronics market. As your wingman, we pride ourselves on rolling up our sleeves to provide compelling and action-oriented insights in areas such as:

- **Antennas**
- **RFMW analog components and integrated microwave assemblies (IMA)**
- **Printed circuit board (PCB) and assembly (PCB-A)**
- **Interconnects** (connectors, cable assemblies) and **EMI filter** products
- **Photonics / optical** communication technologies
- **Communication, radar, signals intelligence and electronic warfare** systems
- **Software defined radio (SDR)** technologies and applications
- Space **semiconductor** design and packaging, including **radiation hardened**
- High reliability and space non-volatile **memory**
- **Power management** semiconductors, components and systems
- **Thermal management** components and systems
- **Motion control / electromechanical** devices
- **Embedded computing**
- **Encryption** devices and standards

Give our unique team a try!
